## DETAILED ACTION

(1). Applicant's Amendments and Remarks filed on 3/30/2009 have been received.

Claims 1, 3-4 and 7 are cancelled.

Claims 2, 5-6 and 8 are amended. New claim 10 is added.

Consequently, the rejections of claims 1-2, 5-6 and 8 in prior Office Action dated 2/12/2009 is withdrawn in view of current Remarks and current Amendments.

## Allowable Subject Matter

(2). Claims 2, 5-6 and 8-10 are allowed.

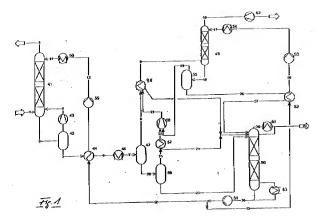

## Reasons for Allowance

(3). The following is an examiner's statement of reasons for allowance:

Instant Application is allowable because the common compressor of instant claim 9, which overcomes prior arts of the records as per said prior art does not anticipate nor render obvious to this additional separation configuration in order to accomplish the selective removal of hydrogen sulfide and carbon dioxide from crude gas (Title). It is further illustrated in the Applicant's Figure below, the common compressor (58), flash gas of low pressure (56) and flash gas coming out of the flash stage (55).

Application/Control Number: 10/550,251

Art Unit: 1797

Because the solubility of carbon dioxide in the solvent is lower than the solubility of hydrogen sulfide, the solvent leaving the flash stage (55) is enriched in hydrogen sulfide and deriched in carbon dioxide so that a more selective separation between hydrogen sulfide and carbon dioxide is achieved. Meantime, by the common compressor 58 to boost the gaseous stream (19), (21) back into the 2<sup>nd</sup> absorber to further release carbon dioxide kept in stream (18), (20).

Prior arts of records Marjanovich et al (US 5820837A) teach two absorption stages to selectively separate acid gases (Title). Marjanovich et al (US 5820837A) do not teach flash stage for the downstream of 2<sup>nd</sup> absorber, the combining stream from flash tank of 1<sup>st</sup> absorber with gaseous stream from flash tank of 2<sup>nd</sup> absorber with a common compressor as claimed by Applicant. Although Sweny et al (US 3877893) teach flash stage for the downstream of 2<sup>nd</sup> absorber, however, the gaseous stream from flash stage of 2<sup>nd</sup> absorber does not contain mainly hydrogen sulfide and carbon dioxide as claimed by Applicant in instant claim 8.

Conclusively, instant claims 2, 5-6 and 8-10 are deemed to be novel and nonobvious over the prior art of record.

Application/Control Number: 10/550,251 Page 4

Art Unit: 1797

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance"
